### Academic Projects

**Capstone Project**                                                                 08/2020-11/2020

Built MVC controllers to provide data to a frontend Angular web application. The data was stored using Entity Framework with SQL and the database was built with EF data migrations. Angular components were created to provide functionality of being able to view and create data through a web browser.

**Movie Showtime Application Project**                                              06/2020-07/2020

Created an application that allowed the end-user to choose a movie to view through selection of a category and timeframe.

**Professional Experience**

**Taco Bell, Lubbock, TX**                                                            **05/2019-10/2020**
**Service Champion**

- Interfaced with 200 customers daily on average to sell fast food and beverages and provide champion-level service.
- Serviced the drive-thru location and the front counter location at 1 restaurant to offer food and beverage products, run the cash register, and closeout orders.
- Trained team members on skills and best practices to improve knowledge of menu options.
- Assisted in the kitchen to put out food, contribute to dishwashing, and setup drink machines.
- Aided cooks in preparing food including air frying as needed.

**Sterling Ventures, Sterling City, TX**                                              **05/2018-09/2018**
**Ranch Hand**

- Ranch hand that carried out a variety of chores in and around the barn. This included cleaning stalls and feeding horses.

**Blood Plasma Laboratories, Lubbock, TX**                                            **05/2015-12/2015**
**Donor Floor Technician**

- Set up approximately 100 blood plasma machines per shift for usage with donors.
- Stocked the donor floor with supplies including gloves, tubing, and bottles to manage resources and make them readily available.
